An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jean Baker on April 1, 2004.

In original claim 15, line 11, after "(d)" please insert -- directly --.

The following is an examiner's statement of reasons for allowance:

The prior art neither suggests nor teaches a method of screening for inhibitor molecules that target viral looping/linking factors in a mammalian cell culture. Applicant's specification has exemplified EBNA looping-linking factor inhibition assay using a gel shift assay (see figure 3) or a promoter activation assay (see figure 2) in the analysis step. The specification also discloses looping-linking factors from other systems (see table 1 and 2).

The declaration filed by Dr. William M. Sugden on January 30, 2004 under 37 CFR 1.131 is sufficient to overcome the Kirchmaier et al. reference.

The declaration under 37 CFR 1.132 filed January 30, 2004 is sufficient to overcome the rejection of claims 15-18 based upon the reference of Becker et al. applied under 35 USC 103.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
